This monumental collection compiles history's greatest written works, from the ancient classics to masterpieces of the 20th century, which have shaped our culture and society. Great Books of the Western World contains 517 complete and unabridged works from 130 authors.

## REVISED AND EXPANDED

With 45 twentieth century authors, this magnificent 60-volume set brings you centuries of celebrated writings from the greatest minds of all time, including Plato, Shakespeare, Swift, Freud, Hemingway, and Twain. Carefully researched and compiled under the editorial leadership of noted scholar Dr. Mortimer J. Adler, each finely crafted volume reflects the quality workmanship, accuracy, and detail that have made Britannica one of the world's most respected names in publishing since 1768.

The new Great Books provide a well-rounded, liberal arts education in many fields of study. Philosophy, religion, mathematics, psychology, astronomy, politics, and anthropology are just a few of the areas you can explore, from the ancient Greeks to such 20th century greats such as Sigmund Freud, Franz Kafka, and T.S. Eliot. You will find Great Books useful for practical, everyday needs, too, like speech writing and business presentations.
